BALDWIN COUNTY,

Loxley, Ala.

SEASON 1951 - 1952

THANKS FOLKS:

For your many visits and orders of the past season. Come again. We are always glad to talk flowers, and help you with your plant troubles.

Terms of Sale

CONDITIONS: We accept all orders on condition that they shall be void, should injury beyond our control befall the stock. Prices listed cancel all previous quotations, and are subject to change without notice.

PAYMENT: Cash with order. C.O.D. shipments will be made only when a twenty-five percent deposit accompanies order. Add sales TAX for all Alabama shipments.

CLAIMS: We guarantee our stock to be true to name and properly packed. Our responsibility for delivery ceases when we have delivered the stock to the transportation Company or Carrier. Any claim for breakage or delay in delivery should be made to them on receipt of stock.

TRANSPORTATION: How and when do you want your order sent; Parcel Post, Motor-Express, Railway-Express or Freight.

We close Sundays.

CAMELLIAS

To you who live in the northern section of the U.S.A. You can have Camellias too. They are easy to grow, just the same as other house plants, it takes time and care just the same as you give your other plants.

Keep plants well watered but not sloppy, if leaves on the plants turn yellow, try using rain water, and giving each pot plant three table-spoonsfull of sulphur. Sulphur makes the soil acid. Camellias with buds do not like to be in a room that is too hot, keep them where it will be about 45 to 50.

Here in the south we must not plant Camellias too deep, we always here at the nursery plant them one inch higher than they were grown in the nursery row.

Always pick a balled and burlaped camellia up by the ball of soil, never by the stem.

We plant on firm ground, and have the hole dug larger than the camellia ball, so that we can put plenty of good soil mixed with peat-moss around the plant, never under, as placing soft soil under a balled plant will let it settle later on and your plants will be planted too deep.

We leave the burlap on our camellias when we plant them.

Always water well when planting and during all dry weather the first year.

Camellias with scale or red-spider should be sprayed with Volck; using it at the rate of one to seventy-five.

We fertilize our plants early in the spring, in June and a light application in the fall.

If there is any information that we can help you with your plants, write, we are always glad to help.

YOU TOO—

Can pick lovely Camellias as the young lady is doing.

By letting Us help You make your selection. You are welcome to come and see the thousands of bloom here at our Nursery, any time, during blooming season.

First flowers begin to arrive in August, more and more keep coming until they are at their best in Dec. Jan. and Feb. We will have flowers up until about the first of April.

We are open for business from 7 a.m. to 5 p.m. on week days. No business on Sundays.

Abbreviations:

E—Early

M—Midseason

L—Late (Time of Blooming)

B-B—Balled and Burlap

BROAD-LEAF EVERGREENS

ABELIA-GRANDIFLORA — This evergreen with green leaves with bronze cast, has white flowers with pink border, all summer. Easy to grow, makes a beautiful foundation planting. Can be sheared and used as single specimen, can be grown as far north as Central Indiana. Small, 8-12 in. plants 25c each. 3-4 ft. heavy plants \$3.00 each.

BUXUS-BOXWOOD — Sempervirens; Slow growing compact box, with deep green pointed leaves. 4-6 in. plants 30c each. 10 for \$2.00.

GROWING GOOD AZALEAS

Azaleas will grow in the sun or in the shade, in the sun you will have brighter colors. Azaleas can be used as pot or tub plants, in sections of the Country where the weather man gives too much ice and snow, for out-side planting.

Azaleas like acid soil, they love peat-moss, use plenty of it in the planting soil, or around your plants when placing them in the lawn.

A mixture of Peat-Moss, leaf mold and cow manure makes a very good soil to use in planting Azaleas.

We fertilize our plants early in the spring, using cottonseed meal, or any good Azalea fertilizer.

Keep well watered during all dry weather. For Scale and Red Spider, spray with Volck, using it, one to fifty. Plants can be dusted with sulphur for Red Spider.

Where there is any doubt if the soil is acid enough to grow good Azaleas, use, aluminum-sulphate in your soil at the rate of one quart to a bushel of soil. Common sulphur can be placed around the plants and help, there is no danger as to the use, it will help with red spider.

Prune or shear your plants just as soon as they are through blooming, to keep them in whatever form you desire.

INDICA AZALEAS

This is the large flowering variety that grows so well here in the South. You will find them growing at Birmingham, Memphis, Little Rock, Tyler and Houston Texas.

Be SURE you give them plenty of moisture, and that you keep the soil acid.
